Education

M.Sc. Data Science

Christ University, Bengaluru, India

June 2024 – Mar 2026

CGPA: 8.92/10

B.Sc. Mathematics, Physics, Computer Science

Andhra Loyola College, Vijayawada, India

June 2020 – May 2023

CGPA: 9.02/10

Work Experience

AI Engineer Intern, Veriright Management Sol Pvt. Ltd., Bengaluru

Jan 2026 – Present

- **AI Social Media Hub:** Built a production-ready AI-powered social media management platform with real-time messaging, AI-assisted replies, analytics, and asynchronous microservices using FastAPI, Celery, Redis, PostgreSQL, and OpenAI
- **SMS-Hulk:** Developed an AI-driven SMS campaign and lead management platform with automated messaging, personalized content generation, campaign scheduling, and scalable FastAPI backend services

AI/ML Engineer Intern, Demetrix Infotech Pvt. Ltd., Bengaluru

July 2025 – Oct 2025

- Built a hybrid RAG system (dense embeddings + BM25 + cross-encoder re-ranking) achieving 92% contextual accuracy on enterprise document retrieval
- Improved retrieval precision by 75% through transformer-based re-ranking and iterative prompt optimization
- Integrated Mistral AI and Qdrant vector database to power multilingual document search across enterprise content
- Cut inference latency by 40% through optimized vector indexing and caching strategies

Key Projects

Smart Keyboard – Offline AI Writing Assistant

[GitHub](#) | 2026

- *Python, PyQt5, ONNX Runtime, pynput* – Built a system-wide Windows tool (Ctrl+Shift+T) that captures, grammar-corrects, and translates selected text entirely offline using quantized ONNX models
- Achieved sub-300ms correction latency via sentence-level splitting, LRU caching, and INT8 quantization, with automatic fallback between two model tiers for speed and accuracy
- Engineered a dual-engine pipeline (grammar + translation) with async callbacks, thread-safe result delivery, and auto-paste into any active application

MedExtract-AI – Medical Report Digitization Platform

[GitHub](#) | 2026

- *FastAPI, OpenAI Vision, PostgreSQL* – Designed a multi-stage document extraction pipeline with page-level confidence routing to minimize AI inference cost
- Built a production-ready FastAPI backend with parallel PDF processing, session-based authentication, and PostgreSQL job tracking
- Generated structured multi-sheet Excel reports (master data, abnormal values, review-required) to enable scalable medical data digitization

CoChain.ai – ML-Powered Student Collaboration Platform

[GitHub](#) | 2025

- *Flask, Supabase, Reinforcement Learning* – Built a full-stack platform enabling 500+ students to discover GitHub projects and form collaboration teams via real-time matching
- Implemented a Thompson Sampling contextual bandit with SentenceTransformer embeddings, improving recommendation relevance by 25% over baseline
- Deployed a production system with an A/B testing framework, rate limiting, and performance monitoring

Research & Publications

I-EAS: Culture-Aware Evaluation of LLM Emotional Intelligence

IEEE ISCS 2025

- Designed a computational framework evaluating LLM emotional intelligence across multilingual Indian cultural contexts
- DOI: 10.1109/ISCS69371.2025.11385960

Technical Skills

Languages: Python, SQL

ML/DL Frameworks: PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, ONNX Runtime

LLM & NLP: RAG, Cross-Encoders, Hybrid Retrieval, Prompt Engineering, LLM Cost/Latency Optimization, Sentence-Transformers

Document AI & OCR: Tesseract OCR, PDF Parsing, Vision-LLM Extraction

Vector Databases: Qdrant, ChromaDB

Backend & Deployment: FastAPI, Flask, Docker, AWS EC2, PostgreSQL, Supabase

Certifications & Teaching

Certifications: Advanced Learning Algorithms (Coursera), Supervised Machine Learning (Coursera), AWS Cloud Fundamentals, SQL for Data Science

Teaching: Python Instructor for 50+ Biostatistics undergraduates, Christ University

Jun – Nov 2025
