PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building production-grade RAG systems, multilingual NLP applications, and generative AI solutions. Specialized in designing and building scalable ML pipelines, optimizing LLM-based systems, and deploying end-to-end AI solutions in production environments.

EDUCATION

Christ University <i>Master of Science in Data Science</i>	Bengaluru, India June 2024 – May 2026
Andhra Loyola College <i>Bachelor of Science in Mathematics, Physics, Computer Science; CGPA: 9.02/10</i>	Vijayawada, India June 2020 – May 2023

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern <i>Demetrix Infotech Pvt. Ltd.</i>	July 2025 – Oct 2025 Bengaluru, India
- Built production-grade RAG system with session-based vector collections achieving 92% contextual accuracy for enterprise document retrieval - Developed hybrid search pipeline combining semantic embeddings with BM25 sparse retrieval and cross-encoder re-ranking, improving precision by 75% - Designed and deployed scalable microservices architecture integrating Mistral AI, Qdrant vector database, and OCR processing for multi-tenant enterprise application - Optimized query latency by 40% through efficient vector indexing and caching strategies for real-time conversational AI	

KEY PROJECTS

CoChain.ai - ML-Powered Student Collaboration Platform <i>Flask, PyTorch, Supabase, RL</i>	2025
- Built full-stack platform enabling 500+ students to discover GitHub projects and form collaboration teams with real-time matching - Implemented Thompson Sampling contextual bandit with SentenceTransformer embeddings improving recommendation relevance by 25% over baseline - Deployed production system with A/B testing framework, rate limiting, and performance monitoring	
Fine-Tuned Stable Diffusion for Art Generation <i>PyTorch, Diffusers, LoRA</i>	2025
- Fine-tuned Stable Diffusion on 80K+ WikiArt dataset for artistic style transfer and content generation applications - Implemented Low-Rank Adaptation (LoRA) reducing trainable parameters by 97.8% while maintaining high-quality output across 15+ art styles - Optimized training pipeline for efficient fine-tuning on consumer hardware, reducing training time by 60%	
Multi-Modal Document Intelligence System <i>LangChain, ChromaDB, BLIP-2, CLIP</i>	2024
- Built enterprise-grade multi-modal RAG system using Mistral embeddings and hybrid retrieval achieving 93% precision on complex documents - Integrated BLIP-2, CLIP, and EasyOCR for automated image classification and text extraction with 97% accuracy - Implemented semantic chunking and context-aware retrieval to handle technical documentation, reports, and visual content	
YouTube Video Analyzer Chrome Extension <i>Flask, Transformers, JavaScript</i>	2024
- Built Chrome extension with multilingual transcript extraction (English, Hindi, Telugu) and RoBERTa-based sentiment analysis on 300+ comments - Implemented DistilRoBERTa emotion detection with asynchronous processing, YAKE keyword extraction, and timestamp-aligned visualization dashboard	

TECHNICAL SKILLS

Programming Languages: Python, SQL
ML/DL Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, Hugging Face Transformers
LLM & NLP: LangChain, Sentence-Transformers, BLIP-2, CLIP, OpenAI API, Mistral AI
Vector Databases: Qdrant, ChromaDB
Core Competencies: RAG Systems, Large Language Models, Computer Vision, NLP, Model Fine-Tuning, A/B Testing

CERTIFICATIONS & TEACHING

Certifications: Advanced Learning Algorithms (Coursera) Supervised Machine Learning (Coursera) AWS Cloud Fundamentals SQL for Data Science
Teaching: Python & ML Instructor for 50+ Bio Statistics undergraduates (Christ University, Jan-May 2025)
