EDUCATION

Christ University <i>Master of Science in Data Science</i>	Bengaluru, India June 2024 – May 2026
Andhra Loyola College <i>Bachelor of Science in Mathematics, Physics, Computer Science, CGPA: 9.02/10</i>	Vijayawada, India June 2020 – May 2023

RESEARCH EXPERIENCE

Independent Research Project <i>Evaluating Emotional Intelligence in Large Language Models</i>	June 2025 – Nov 2025 Christ University
- Developed Indian Emotional Alignment Score (I-EAS) framework to quantitatively assess cultural and emotional responsiveness of LLMs across Hindi, Tamil, and English - Engineered multilingual evaluation dataset of 150 culturally-grounded prompts, generating 450 model outputs from GPT-4, Claude, and Krutrim - Applied statistical validation using Pearson correlation and ANOVA to identify significant performance disparities across models	
AI/ML Research Intern <i>Demetrix Infotech Pvt. Ltd.</i>	July 2025 – Oct 2025 Bengaluru, India
- Architected production-grade RAG system with session-based vector collections achieving 92% contextual accuracy - Engineered hybrid search combining semantic embeddings with BM25 sparse retrieval and cross-encoder re-ranking, yielding 75% precision improvement - Designed scalable microservices architecture integrating Mistral AI, Qdrant vector database, and OCR processing for enterprise deployment	

TECHNICAL PROJECTS

Fine-Tuning Stable Diffusion with LoRA for Art Style Transfer <i>PyTorch, Diffusers</i>	2025
- Curated 80K+ WikiArt dataset for domain-specific fine-tuning of text-to-image diffusion models - Implemented Low-Rank Adaptation reducing trainable parameters by 97.8% while preserving artistic fidelity across 15+ art movements	
Multi-Modal Document Intelligence System <i>LangChain, ChromaDB, BLIP-2</i>	2024
- Built multi-modal RAG platform using Mistral embeddings, semantic chunking, and hybrid retrieval in LangChain + Chroma, achieving 93% retrieval precision on complex enterprise documents - Integrated BLIP-2, CLIP, and EasyOCR for zero-shot image classification and OCR with 97% accuracy	
YouTube Video Analyzer Chrome Extension <i>Python, Flask, NLP, JavaScript</i>	2024
- Built Chrome extension analyzing 100K+ videos with multilingual transcript extraction (98% accuracy) and real-time sentiment + emotional arc visualization - Engineered timestamp-aligned comment sentiment analysis and scalable UI with infinite scroll, faceted search, and CSV export	
Traffic Sign Classification with Deep CNN <i>TensorFlow, Keras, OpenCV</i>	2024
Achieved 96.96% accuracy on 50K+ German Traffic Sign Benchmark using custom CNN with comprehensive augmentation and regularization	

TECHNICAL SKILLS

Languages: Python, SQL, R
ML/DL Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, Transformers, Diffusers
NLP/LLM Tools: LangChain, Sentence-Transformers, Hugging Face, BLIP-2, CLIP
Vector Databases: Qdrant, ChromaDB, Pinecone
Research Methods: Statistical Analysis, Experimental Design, Data Visualization, A/B Testing
Specializations: Retrieval-Augmented Generation, Large Language Models, Generative AI, Multilingual NLP

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Advanced Learning Algorithms (Coursera), Supervised ML (Coursera), AWS Fundamentals (AWS Builder), SQL for Data Science
Teaching: Python Instructor for 50+ Biotechnology undergraduates achieving 95% proficiency rate (Christ University, 2025)
